

Message

“Challenges are what makes life interesting, overcoming them is what makes life meaningful.”

-Joshua. J. Marine

Congratulations to our K to 12 graduates of 2018!

You are greatly blessed because you are one of the country’s greatest resources, and the nation has invested so much in preparing you to face the World. As a K to 12 learner you have been equipped with the abilities and qualities to compete with the world.

You will soon transit from graduation to the next phase, whether its higher learning or employment, or perhaps entrepreneurship, the journey to get there will always be filled with challenges the ship that will bring you across may either be big or small. But it is not the ship that matters. It is you-the ship’s captain who makes the difference and matters the most.

Put to good use your K-12 education, the skills and abilities instilled in you and you will rise above the rough waves of life and conquer the strong cyclones of global competition. Remember that we don’t grow when everything is easy. We grow in the presence of challenges.

Further, as you continue on in life, always nurture a humble heart, radiate the spirit of gratitude, and live life with passion for service.

Congratulations and get ready to rock and roll with the world!

SALUSTIANO T. JIMENEZ, CESO VI
